UPDATE V1.5

"Social Microblogging PRO"

By Miguel Vasquez

- Fixed bug with image of Google Place
- Added support for SSL in external links
- Added field Geolocation Database

Files Affected

- / **public** / **ajax** / addPost.php
- / **public** / **ajax** / post_details.php
- / **public** / **ajax** / posts_ajax_timeline.php
- / **views** / **index /** index_session_null.phtml
- / **views** / **user /** status.phtml
- / **views** / **user /** profile.phtml

Note: If you are a new customer do not replace the database, if you bought the script in version 1.4.1 and do not have the "geolocation" field in the "posts" table replaces the database version 1.5

Thanks!
